That's great Michael. Yes if you can forward Doug's bio that would help. Yes, would want him on the call Thursday. Also is Arvind available on Thursday?

Carolyn,

I may be able to have the TechLaw groundwater modeler and Karla both join the call if you want. Doug Cosler is our modeler. He has a Ph.D. and serves as an expert witness. I can give you more info on his bio if you would like, but sounds like he may be the perfect person to evaluate the model. I do want to let you know that he bills at a specialist rate (same as Tom Hall), but since we recently received a healthy infusion of funds, this may be less of a concern. If we would like to conserve, it might make more sense to have Karla on the call since she has knowledge of the situation, and work with Doug after that to review the model, EBR work plan, and proposed milestones. Karla also has experience working with MODFLOW. Let me know how you would like to proceed. I have a call with Doug today and can give him more information. I would also need to give him some budget to scan the WP to prep for the call.

MODFLOW-SURFACT is the model they are using; first question, is this appropriate for modeling biodegradation over 20+ years?

We need someone specifically to review the biodegradation/MNA modeling, not so much flow and transport modeling.

I will check into this. Since our last email exchange, I've also found out we have a modeler on the east coast who is a TechLaw employee. I'll reach out to both to see who is more appropriate based on your description of the scope.

Michael

Great! Is he comfortable with biodegradation modeling as well? At this point, would like to get him to look at the bits and pieces of modeling efforts in the EBR workplan and sit in on the meeting on Thursday, and possibly provide a formal review later on.

For COI scan any former military service probably wouldn't matter, would be more of a question if he has COI with Amec.

Carolyn, we have a groundwater modeler at TLI Solutions, one of our sister companies. We could use him after we run a COI screen. Before we do that, can you let me know what capacity you would like him to serve? would it be to call in to the meeting and provide his thoughts, review the model after the meetings, something else, all of the above? Inquiring minds want to know.

Karla and/or Arvind. I understand AF will be giving an overview of their biodegradation model and also proposing milestones for evaluating remedial progress.
